

### **About Orpeth**

I.J. Good used to publish very short papers sometimes. I mean VERY short. Why mess around with objections and counter-objections when other people are going to do that for you anyway?

The big advantages of this format are:

- (a) It's fun, for both writers and readers.
- (b) The reader can find the writer's main argument easily. We think that is worth a lot.

So, this is a new journal for very short papers. We hope you enjoy it.
